

PROJECT 003

Rural Health Facility Reality Assessment

FACILITY ASSESSMENT REPORT

Ayushman Arogya Mandir, Barara

Evidence-based public-interest field assessment aligned to applicable IPHS 2022 facility-level standards.

FIELD ASSESSMENT DATE	14 September 2026
FACILITY	Ayushman Arogya Mandir, Barara
ASSESSMENT BASIS	Indian Public Health Standards (IPHS) 2022
PREPARED BY	THE OVIE CIRCLE FOUNDATION
NATURE	Evidence-Based Public-Interest Field Assessment

ASSESSMENT PRINCIPLE

Observe without interference. Record only what is directly visible or verifiable. Use 'Not Verified' where access or records would be required. Protect patient privacy.

OBSERVE | VERIFY | DOCUMENT | RECOMMEND | COLLABORATE | IMPROVE

EXECUTIVE SUMMARY

Multiple support-service gaps require coordinated corrective action.

THE OVIE CIRCLE FOUNDATION conducted a field assessment of Ayushman Arogya Mandir, Barara on 14 September 2026 under PROJECT 003 - Rural Health Facility Reality Assessment.

The field assessment identified specific operational gaps in sanitation, laboratory support, technical support and solar/power-support infrastructure.

01	CLEANING / SANITATION	Cleaner/cleaning support was unavailable and the related cleaning service was not functioning at the time of assessment.
02	LABORATORY SUPPORT	Lab Assistant was unavailable; related laboratory support work was not functioning.
03	TECHNICAL / SOLAR SUPPORT	Technician was unavailable and the solar plant was recorded as unavailable during the field visit.

INSTITUTIONAL POSITION

The findings are documented as specific operational deficiencies requiring targeted administrative attention. They do not constitute a blanket finding that the entire facility is non-functional.

01 | ABOUT THE COMPANY

Evidence first. Public interest. Constructive engagement.

THE OVIE CIRCLE FOUNDATION is a Section 8 Company undertaking evidence-based public-interest work. The Company works at the ground level through direct field observation, structured assessment, evidence-based documentation, identification of public-service gaps, institutional reporting, community participation and engagement with Government and administration.

The Company's purpose is not limited to identifying deficiencies. It seeks to contribute towards practical improvement of public services by working constructively with Government, administration, public institutions and communities.

WORKING CAPABILITY

Ground-level assessment | Evidence-based documentation | Structured reporting
Public-interest coordination | Community engagement | Follow-up assessment

02 | ABOUT PROJECT 003

Rural Health Facility Reality Assessment

PROJECT 003 assesses selected Government health facilities with reference to directly observable and verifiable conditions and, wherever applicable, the Indian Public Health Standards (IPHS) 2022.

The assessment considers healthcare service availability, human resources, infrastructure, medicines and pharmacy, diagnostics and equipment, sanitation and cleanliness, essential utilities, patient-facing conditions and the overall facility environment.

PROJECT PURPOSE

To create a reliable ground-level record that may assist competent Government authorities in understanding existing conditions, prioritising gaps and considering practical improvements.

03 | OBSERVED FACILITY CONTEXT

Specific support-service gaps within an accessible public health facility.

The field visit documented an accessible facility with public-facing rooms/service points including injection, family-planning and medicine/registration areas. The assessment therefore does not state that the entire facility was closed or non-functional. The verified deficiencies concern specific support personnel and infrastructure.

BALANCED ASSESSMENT

Rooms and service points may physically exist even when the personnel needed to operate related services are unavailable. The report therefore distinguishes infrastructure presence from actual staff/service availability.

04 | PRIMARY FINDING

BRR-01 | CLEANER / SANITATION SUPPORT

STATUS: NOT AVAILABLE / SERVICE NOT FUNCTIONING

Cleaner/cleaning staff was unavailable and the related cleaning service was not functioning at the time of assessment.

PUBLIC-INTEREST SIGNIFICANCE

Continuous sanitation is essential in a public health facility and depends on adequate cleaning personnel or an effective contracted arrangement.

RECOMMENDATION

The competent authority may review and restore the applicable cleaning/sanitation staffing or service arrangement.

05 | KEY FINDING

BRR-02 | LABORATORY SUPPORT

STATUS: LAB ASSISTANT NOT AVAILABLE

A Lab Assistant was unavailable and related laboratory support work was recorded as not functioning.

PUBLIC-INTEREST SIGNIFICANCE

Laboratory support can be important for timely basic diagnostic services and clinical decision-making.

RECOMMENDATION

The competent authority may review the applicable laboratory staffing/service requirement and arrange the necessary support.

06 | KEY FINDING

BRR-03 | TECHNICAL SUPPORT

STATUS: TECHNICIAN NOT AVAILABLE

A technician was unavailable and the related technical support/service was not functioning at the time of assessment.

PUBLIC-INTEREST SIGNIFICANCE

Unavailable technical support can affect the reliable operation, upkeep or troubleshooting of facility systems and equipment.

RECOMMENDATION

The competent authority may review the applicable technician/support requirement and restore appropriate technical coverage.

07 | KEY FINDING

BRR-04 | SOLAR PLANT

STATUS: NOT AVAILABLE

A solar plant was recorded as unavailable during the field assessment.

PUBLIC-INTEREST SIGNIFICANCE

Reliable backup/alternative power support can contribute to continuity of essential health-facility operations.

RECOMMENDATION

The competent authority may verify whether a solar/power-support system is sanctioned/applicable for the facility and restore or provide the appropriate arrangement where required.

**07 | OVERALL FACILITY ASSESSMENT****Strengthen what works. Address what is missing.**

The Barara assessment identifies multiple operational gaps linked to unavailable support personnel and infrastructure. These gaps can affect routine facility functioning even where the premises and several public-facing service areas remain accessible.

PRIORITY	ISSUE	PROPOSED ADMINISTRATIVE CONSIDERATION
I	Sanitation support	Restore cleaning personnel/service arrangements and verify sustained sanitation coverage.
II	Laboratory support	Review Lab Assistant/laboratory-support availability as applicable to the facility level.
III	Technical support	Restore technician/technical support according to applicable facility requirements.
IV	Solar/power support	Verify sanctioned/applicable solar or backup-power arrangements and restore where required.

ASSESSMENT POSITION

Corrective action should focus on the specific unavailable support functions identified during the visit, without overstating conditions that were not directly verified.

08 | PROPOSED GOVERNMENT-COMPANY COOPERATION

From identification to improvement.

THE OVIE CIRCLE FOUNDATION respectfully expresses its willingness to cooperate with Government and competent Health Department authorities in addressing feasible deficiencies identified at Ayushman Arogya Mandir, Barara.

Subject to Government approval, applicable law, available resources and mutually agreed responsibilities, cooperation may be explored in the following areas:

SANITATION & CLEANLINESS

Support for approved cleanliness and sanitation improvement initiatives.

DOCUMENTATION & FOLLOW-UP

Evidence-based documentation of staffing/service restoration and observable improvements.

FACILITY UPKEEP

Participation or resource mobilisation for approved public-facing maintenance initiatives.

COMMUNITY PARTICIPATION

Public-health awareness and community participation connected with the facility.

RESOURCE MOBILISATION

Exploration of appropriate lawful resources for Government-approved interventions.

OTHER APPROVED INITIATIVES

Participation in other healthcare-support activities mutually considered appropriate by Government and the Company.

09 | CLEAR DIVISION OF RESPONSIBILITY

Support Government action - do not substitute Government authority.

THE OVIE CIRCLE FOUNDATION recognises that creation or sanction of Government posts, appointment of Government doctors, transfer and deployment of Government personnel, administrative control of Government healthcare facilities and other statutory Government functions remain within the jurisdiction of competent Government authorities.

The Company's proposed role is limited to lawful and approved areas where its field capability, documentation, community participation, resource mobilisation or other institutional support can complement Government action.

10 | REQUEST FOR CONSIDERATION

THE OVIE CIRCLE FOUNDATION respectfully places this field assessment before the competent Government/Health Department authorities for consideration.

REQUESTED FOCUS

1. Restore cleaner/sanitation support and related service functioning.
2. Review Lab Assistant/laboratory support availability.
3. Review technician/technical support availability.
4. Verify and address solar/power-support requirements where applicable.
5. Consider Government-Company cooperation in suitable approved areas.

11 | CONCLUSION

Specific operational gaps should become the starting point for targeted improvement.

The field assessment of Ayushman Arogya Mandir, Barara identifies discrete operational deficiencies in sanitation, laboratory support, technical support and solar/power-support infrastructure.

The findings are intended to support targeted corrective action rather than a blanket conclusion regarding the entire facility.

THE OVIE CIRCLE FOUNDATION remains willing to cooperate with competent Government authorities in feasible, lawful and mutually approved improvement measures.

OUR APPROACH

**OBSERVE RESPONSIBLY.
DOCUMENT ACCURATELY.
ENGAGE CONSTRUCTIVELY.
SUPPORT IMPROVEMENT.**
